

# Capital Area **Community Action** Agency

## **Strategic Plan** **2022-2026**

The Capital Area Community Action Agency is dedicated to people living prosperous lives. The agency serves a region made up of eight rural and suburban counties. Over the past five years after suffering through hurricanes, pandemics, major storms, inflation, and a recessive economy, demands on the agency continue to grow. While regional growth has increased by 3.5%, the population has declined in five of the eight counties over the last ten years. Population growth in three counties – Franklin, Leon and Wakulla – are growing at the national rate around 7% but half that of the state’s explosive 15% growth rate.

Demographic data helps to inform the agency’s board of directors and program staff to help make better strategic decisions focusing on the most vulnerable populations while working to maximize efforts to support true transformational change for residents to move out of poverty.

After an analysis of the community needs assessment, the agency will carry forward some of its strategic plan initiatives from the past while exploring new opportunities for growth and service to the communities it serves.

### ***Goal 1. Single mothers living in poverty.***

Nearly 19% of women living in the region live at or below the poverty line. In the region, more than 6,000 families in poverty have a female head of household – as compared to 1,000 headed by a man and 2,600 headed by two parents. Most counties have more than 50% of youth living below 200% of the poverty level.

Strategy – The agency will build on existing and forge new partnerships with partner social service organizations that focus on women. Priority will be given to single mothers for crisis with Head Start, LIHEAP, LIHWAP, weatherization assistance, and other services such as Getting Ahead/Staying Ahead.

### ***Goal 2. High regional poverty rate.***

While the region’s poverty rate has declined slightly from 20% to 19%, the rate is still considerably above the state (14%) and national (14%) rates. Despite the various social service organizations focused on meeting the needs of this population, only this agency has a robust transformational program in Getting Ahead/Staying Ahead.

Strategy – The agency will work to encourage and facilitate training for other partner social service agencies to offer Getting Ahead/Staying Ahead. Additionally, Getting Ahead/Staying Ahead services will be targeted toward high-poverty communities within each county.

### ***Goal 3. Strengthen partnerships***

The entire social services sector is too fragmented and fails to collaborate to serve households holistically. Even within the agency, a special effort is required to promote collaboration amongst agency-run programs. Current efforts with CareerSource organizations, ECHO, and the Kearney Center (homeless) have produced promising outcomes with complementary funding serving all household members.

Strategy – Convene quarterly meetings of social service partner agencies that serve similar populations and implement multi-agency case management plans to meet the needs of entire households.

### ***Goal 4. Housing improvement***

Weatherization assistance program services help make homes more energy efficient. Other housing-improvement programs like the State Housing Initiatives Partnership (SHIP) also work to rehabilitate substandard housing. The agency has begun a new initiative in Franklin County to coordinate SHIP and the Weatherization Assistance Program to better meet the needs of the household.

Strategy – Expand the SHIP-Weatherization partnership to other counties – whether the agency coordinates the SHIP program or not – to strengthen the housing stock available for low income families.

## Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 24,734 persons in the report area are of foreign birth, which represents 5.69% of the report area population. This percentage is less than the national average of 13.51%.

## Jobs and Earnings by Sector

The number of jobs and total wage and salary earnings from employment in the report area are broken down by economic sector in this indicator output. These figures include both private and government employment. The sectors listed represent private employment except for the last table which includes all the earnings from jobs with local, state and federal government. A negative number means that overall business in that sector lost money for the year in the report area.

### Notes:

- (D) - Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals
- (L) - Less than \$50,000, but the estimates for this item are included in the totals
- (no data) - Data not available for this year.

## Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the

householder or not. Because many households consist of only one person, average household income is usually less than average family income.

## Poverty - Population Below 185% FPL

In the report area 34.31% or 138,785 individuals for whom poverty status is determined are living in households with income below 185% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Note: The total population measurements for poverty reports are lower, as poverty data collection does not include people in group quarters. See Methodology for more details.

## Poverty - Children Eligible for Free/Reduced Price Lunch

Free or reduced price lunches are served to qualifying students in families with income between under 185 percent (reduced price) or under 130 percent (free lunch) of the US federal poverty threshold as part of the federal National School Lunch Program (NSLP).

Out of 52,043 total public school students in the report area, 24,553 were eligible for the free or reduced price lunch program in the latest report year. This represents 49.1% of public school students, which is lower than the state average of 54.4%.

Note: States with more than 80% records "not reported" are suppressed for all geographic areas, including hospital service area, census tract, zip code, school district, county, state, etc.

## Poverty - Children Below 200% FPL

In the report area 42.70% or 34,134 children are living in households with income below 200% of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

*Note: The total population measurements for poverty reports are lower, as poverty data collection does not include people in group quarters. See Methodology for more details.*

## Low Income and Low Food Access

This indicator reports the percentage of the low income population with low food access. Low food access is defined as living more than 1 mile (urban) or 10 miles (rural) from the nearest supermarket, supercenter, or large grocery store. Data are from the April 2021 [Food Access Research Atlas](#) dataset. This indicator is relevant because it highlights populations and geographies facing food insecurity.

20.33% of the low-income population in the report area have low food access. The total low-income population in the report area with low food access is 33,209.

## Adult Literacy

Literacy data published by the Program for the International Assessment of Adult Competencies (PIACC) breaks adult literacy into three different "Levels". Those reported as Level 1 are at risk for being able to understand printed material. Those at the upper end of Level 1 can read and understand the text well enough to be able to perform small task, but might have difficulty understanding or drawing inferences from multiple forms of text. Those at the lower end may struggle with basic vocabulary or even be functionally illiterate.

The percentage at or below Level 1 for literacy in the report area is estimated at 21.3%, with a 95% probability that the actual (true, unknown) percentage is between 17.3% and 25.3%.

## Adult Literacy Level 2

Those reported at Level 2 still struggle to perform text based informational tasks, but are considered to be nearing reading proficiency. People in this literacy level can usually be able to read printed words and digital print, as well as being able to relate and make inferences from multiple pieces of information that can be pulled from more than one document. Complex evaluation and inferencing may still be too difficult.

The percentage at or below Level 2 for literacy in the report area is estimated at 31.6%, with a 95% probability that the actual (true, unknown) percentage is between 26.3% and 37%.

### Adult Literacy Level 3

Those reported at Level 3 still are proficient in reading. This includes being able to understand and work with multiple complex texts, while still being able to evaluate the reliability of sources. People in this level can infer complex ideas and sophisticated meanings from written documents and texts.

The percentage at or below Level 3 for literacy in the report area is estimated at 47%, with a 95% probability that the actual (true, unknown) percentage is between 41.9% and 52.1%.

## Housing

### Households - Overview

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption\*. A non-family households is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

*\*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.*

## Housing Costs - Cost Burden (30%)

This indicator reports the percentage of the households where housing costs are 30% or more of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels. Of the 168,473 total households in the report area, 52,814 or 31.35% of the population live in cost burdened households.

## Housing Costs - Cost Burden, Severe (50%)

This indicator reports the percentage of the households where housing costs are 50% or more total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

## Housing Quality - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 168,473 total occupied housing units in the report area, 53,955 or 32.03% have one or more substandard conditions.

## Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

## Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

## Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 71,943 rental homes in the report area, there were 5,012 eviction filings, for an eviction filing rate of 6.97%. 1,720 of the eviction filings ended in an eviction, for an eviction rate of 2.39%.

Note: Not all counties have data that has been provided. Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

## Eviction Filings by Neighborhood Predominant Race/Ethnicity, 2016

Totals by combined race and ethnicity are calculated by aggregating data on evictions in census block groups with a majority of the population (over 50%) belonging to a specific race/ethnicity. Reported race/ethnicity categories include: Non-Hispanic White; Black or Africa American; Asian, and Hispanic or Latino. In some counties there are no majority Black, Asian, or Hispanic census block groups.

Note: Not all counties or states have data that has been provided.

## Homeless Children & Youth

This indicator reports the number of homeless children and youth enrolled in the public school system during the school year 2019-2020. According to the data source definitions, homelessness is defined as lacking a fixed, regular, and adequate nighttime

residence. Those who are homeless may be sharing the housing of other persons, living in motels, hotels, or camping grounds, in emergency transitional shelters, or may be unsheltered. Data are aggregated to the report-area level based on school-district summaries where three or more homeless children are counted.

In the report area, of all the 51,512 students enrolled in reported districts during the school year 2019-2020, there were 1,568 or 3.04% homeless students, which is higher than the statewide rate of 2.80%.

*Note: Data are available for 100.00% school districts in the report area, representing 100.00% of the public school student population.*

## Other Social & Economic Factors

### Social Vulnerability Index

The degree to which a community exhibits certain social conditions, including high poverty, low percentage of vehicle access, or crowded households, may affect that community's ability to prevent human suffering and financial loss in the event of disaster. These factors describe a community's social vulnerability.

The social vulnerability index is a measure of the degree of social vulnerability in counties and neighborhoods across the United States, where a higher score indicates higher vulnerability. The report area has a social vulnerability index score of 0.57, which is less than the state average of 0.61.

## Food Environment - Food Desert Census Tracts

This indicator reports the number of neighborhoods in the report area that are within food deserts. The USDA Food Access Research Atlas defines a food desert as any neighborhood that lacks healthy food sources due to income level, distance to supermarkets, or vehicle access. The report area has a population of 72,155 living in food deserts and a total of 16 census tracts classified as food deserts by the USDA.

## Food Environment - Grocery Stores

Healthy dietary behaviors are supported by access to healthy foods, and grocery stores are a major provider of these foods. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Delicatessen-type establishments are also included. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores, are excluded. This indicator describes the number of grocery stores and the number of grocery stores per 100,000 in the report area.

*Note: Counts of establishments < 3 are suppressed.*

## Property Crime - Total

This indicator reports the rate of property crime offenses reported by law enforcement per 100,000 residents. Property crimes include burglary, larceny-theft, motor vehicle theft, and arson. This indicator is relevant because it assesses community safety.

In the report area, 15,093 property crimes occurred in 2014 and 2016 (two years). The property crime rate of 3,514.2 per 100,000 residents is higher than the statewide rate of 2,801.0 per 100,000.

*Note: Data are suppressed for counties if, for both years of available data, the population reported by agencies is less than 50% of the population reported in Census, or if less than 80% of agencies measuring crimes reported data.*

## Physical Inactivity

Within the report area, 75,155 or 22.4% of adults aged 20 and older self-report no active leisure time, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health. Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.

## Obesity

This indicator reports the number and percentage of adults aged 20 and older self-report having a Body Mass Index (BMI) greater than 30.0 (obese). Respondents were considered obese if their Body Mass Index (BMI) was 30 or greater. Body mass index (weight [kg]/height [m]<sup>2</sup>) was derived from self-report of height and weight. Excess weight may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, there are a total of 93,775 adults age 20 and older who self-reported having a BMI greater than 30.0. This represents a 28.2% of the survey population.

Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.

## Late or No Prenatal Care

This indicator reports the percentage of women who did not obtain prenatal care until the 7th month (or later) of pregnancy or who didn't have any prenatal care, as of all who gave birth during the three year period from 2017 to 2019. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Within the report area, of the total births of 9,015 during 2017 and 2019, births with late or no prenatal care was 640 or 7.10%.

This is higher than the national average rate of 6.12%.

*Note: Data are suppressed for counties with population less than 100,000 or when the birth counts represent fewer than ten persons.*

## Healthcare Access

### Insurance - Uninsured Adults

The lack of health insurance is considered a *key driver* of health status.

This indicator reports the percentage of adults age 18 to 64 without health insurance coverage. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

## Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

Within the report area, there are 23 Federally Qualified Health Centers. This means there is a rate of 5.32 Federally Qualified Health Centers per 100,000 total population.

## Persons Receiving Medicare

The total number of persons receiving Medicare is shown, broken down by number over 65 and number of disabled persons receiving Medicare for the report area. The U.S. Department of Health and Human Services reported that a total of 76,526 persons were receiving Medicare benefits in the report area in 2019. A large number of individuals in our society are aware that persons over 65 years of age receive Medicare; however, many of them are unaware that disabled persons also receive Medicare benefits. A total of 10,645 disabled persons in the report area received Medicare benefits in 2019.

## Health Outcomes

### Hospitalizations - Emergency Room Visits

This indicator reports the number and rate of emergency room (ER) visits among Medicare beneficiaries age 65 and older. This indicator is relevant because emergency room visits are "high intensity" services that can burden on both health care systems and patients. High rates of emergency room visits "may indicate poor care management, inadequate access to care or poor patient choices, resulting in ED visits that could be prevented"<sup>1</sup>.

In the latest reporting period there were 73,194 Medicare beneficiaries in the report area. Beneficiaries had 20,614 emergency room visits, and the rate of visits per 1,000 beneficiaries was 665.0. The ER visit rate in the report area was higher than the state rate of 537.0 during the same time period.

## Life Expectancy by Census Tract

This indicator reports the average life expectancy at birth. Life expectancy measures the average number of years from birth a person can expect to live, according to the current mortality experience (age-specific death rates) of the population. Life expectancy takes into account the number of deaths in a given time period and the average number of people at risk of dying during that period, allowing us to compare data across census tracts with different population sizes.

Within the report area, the average life expectancy at birth is 77.54 of the total population.

Note: Data are suppressed for areas with fewer than 5,000 total population (pooled) during the study period.

## Life Expectancy (2010-2015) - Geographic Disparity

The tables and charts below display summary measures describing the distribution of life expectancy values within the report area, including the range (maximum - minimum) and variance. Variance measures include the standard and weighted variance. Weighted variance takes into consideration the population of the neighborhoods/census tracts in determining the spread or values.

Note: No data are provided for counties with fewer than 2 valid data points in the report area.

## Cancer Incidence - All Sites

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older).

Within the report area, there were 1,952 new cases of cancer reported. This means there is a rate of 416.9 for every 100,000 total population.

## Deaths of Despair (Suicide + Drug/Alcohol Poisoning)

This indicator reports average rate of death due to intentional self-harm (suicide), alcohol-related disease, and drug overdose,

also known as "deaths of despair", per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because death of despair is an indicator of poor mental health.

Within the report area, there were 829 deaths of despair. This represents an age-adjusted death rate of 36.9 per every 100,000 total population.

*Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.*

## Mortality - Firearm

This indicator reports the 2016-2020 five-year average rate of death due to firearm wounds per 100,000 population, which includes gunshot wounds from powder-charged handguns, shotguns, and rifles. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. This indicator is relevant because firearm deaths are preventable and they are a cause of premature death.

Within the report area, there are a total of 266 deaths due to firearm wounds. This represents an age-adjusted death rate of 12.5 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

## Mortality - Opioid Overdose

This indicator reports the 2016-2020 five-year average rate of death due to opioid drug overdose per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because opioid drug overdose is the leading cause of injury deaths in the United States, and they have increased dramatically in recent years.

Within the report area, there are a total of 105 deaths due to opioid overdose. This represents an age-adjusted death rate of 6.7 per every 100,000 total population.

*Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.*

## COVID-19 Fully Vaccinated Adults

This indicator reports the percent of adults fully vaccinated for COVID-19. Data is updated daily from the CDC API. Vaccine hesitancy is the percent of the population estimated to be hesitant towards receiving a COVID-19 vaccine. The Vaccine Coverage Index is a score of how concerning vaccine rollout may be in some communities compared to others, with values ranging from 0 (least concerning) to 1 (most concerning).
